A Growing Demand for Cyber Security

The industry demand for skilled cyber professionals continues to outpace the availability of trained and knowledgeable individuals. More than 209,000 cyber security jobs in the U.S. are currently unfilled and the demand for positions such as information security professionals is expected to grow by 53 percent through 2018. Our CISSP® Exam Preparation course readies tech-savvy individuals to take the CISSP® certification exam. Once certified individuals will have the credentials necessary to secure a position in an industry with job growth potential and salaries that are eclipsing all other IT-related professions.

About the CISSP Exam Preparation Course

The Certified Information Systems Security Professional (CISSP®) Exam Prep course is a 10-week program designed to cover all 8 Domains of security practice as specified by the International Information Systems Security Certification Consortium (ISC)². The conduct of the class is hybrid in nature, meaning it is conducted both online and in a classroom. It is a comprehensive review of information systems security concepts and industry best practices. Upon completion of this course, students will have the knowledge necessary to successfully take the (ISC)² CISSP® certification exam.

Course Information

The class meets once a week for 4 hours and includes lectures, Q&A, and test reviews. Practice tests with sample questions are a key part of preparation for the exam, therefore, students will be able to work on questions during each classroom session. In addition, one online chat session will be scheduled each week as needed to allow for questions and discussion of any other course-related material.

Course Hours: 50 Hours
Length of Course: 10 Weeks
CEUs: 5.0

Location: Hybrid (Online & On-Campus)
Meets: Mondays & Wednesday from 6:00 - 9:00 PM
Cost: $2,495

Who Will Benefit from this Course?

This course is designed to prepare individuals with diverse experiences and training such as military, legal, law enforcement and management to take the exam. The CISSP® certification is the ideal credential for those with proven deep technical and managerial competence, skills, experience, and knowledge to design, engineer, implement, and manage any organizations’ overall information security program to protect it from growing sophisticated attacks.
